Title	Web-Based Tourism Information System of Tuguegarao City
Year	2007
Program	Master in Information Systems

ABSTRACT

The Web-based Tourism Information System of Tuguegarao City is a web-based system that aims to promote tourism and the culture of the "Ibanags", the native of Tuguegarao City. It is a web-based system design using PHP script and HTML script. It is implemented in a client-server environment using the Apache Server, and for easy retrieval and updating of data, it used MySQL as the database tool language.
